

Vollmer Rd and Halsted St <Eastbound>

RLR Crash Data and Analysis

The table and chart below show a summary of motor vehicle crashes at the intersection of Vollmer Rd and Halsted St over a span of 7 years. The data from 2007-2008 show the period prior to the installation of RLR cameras. The data from 2009 show the year in which the cameras were installed. The data from 2010-2013 show the period following the installation.

	Turning	Rear End	Angle	Fixed Object	Other	Total
2007	2	5	0	1	0	8
2008	4	4	0	1	0	9
2009	3	1	0	0	0	4
2010	3	0	1	0	1	5
2011	2	4	0	0	0	6
2012	1	3	2	1	0	7
2013	0	4	0	0	0	4

In 2008 the Average Daily Traffic (ADT) volume along Vollmer Rd reached 6,100 to 10,500 cars at the intersection of Vollmer Rd and Halsted St. The ADT along Halsted St reached 17,900 according to IDOT.

By 2010 there was an increase in ADT along Halsted St (25,400). There was also an increase in ADT along Vollmer Rd on the west side of Halsted St (12,500), with a decrease in ADT on the east side of Halsted St (5,300).

By 2013 there was slight decrease in ADT along Halsted St (23,500) while the ADT along Vollmer Rd held steady (5,300 to 12,500).

Crash Route: IL001 | From MileStation 310.5 to 310.5 | County : Cook | Intersection Related: Intersections | *See Notes at End of Report.

Notes

Current year and previous year data are not yet complete and are subject to change as more information becomes available. Calendar date selections include data based on the date of the crash. Year selections include data based on the statistical year in which the crash was processed.

The intersection-related field could be incorrect and affect the data on the report.

If a crash occurs between two municipalities, it may be coded to another city/county from what is on the crash report.

Crashes with incomplete location information are not included.

Areas where routes have more than one junction have been known to cause problems in determining accurate locations. Please notify us to verify the data for intersections with more than one junction.

For roadway segments which include the intersection of two routes, the intersection report may need to be run on the other route in order to get all the crashes.

Notes

Current year and previous year data are not yet complete and are subject to change as more information becomes available. Calendar date selections include data based on the date of the crash. Year selections include data based on the statistical year in which the crash was processed.

The intersection-related field could be incorrect and affect the data on the report.

If a crash occurs between two municipalities, it may be coded to another city/county from what is on the crash report.

Crashes with incomplete location information are not included.

Areas where routes have more than one junction have been known to cause problems in determining accurate locations. Please notify us to verify the data for intersections with more than one junction.

For roadway segments which include the intersection of two routes, the intersection report may need to be run on the other route in order to get all the crashes.

Traffic Volume

September 2008

The traffic numbers below were obtained from the IDOT website per the RLR Guideline document published by IDOT. Only ADT values were available, peak numbers were not provided.

IL Route 1 (Halsted Street) ADT

- North: 17,900
- South: 17,900

Vollmer Road ADT

- East: 6,100
- West: 10,500

December 2010

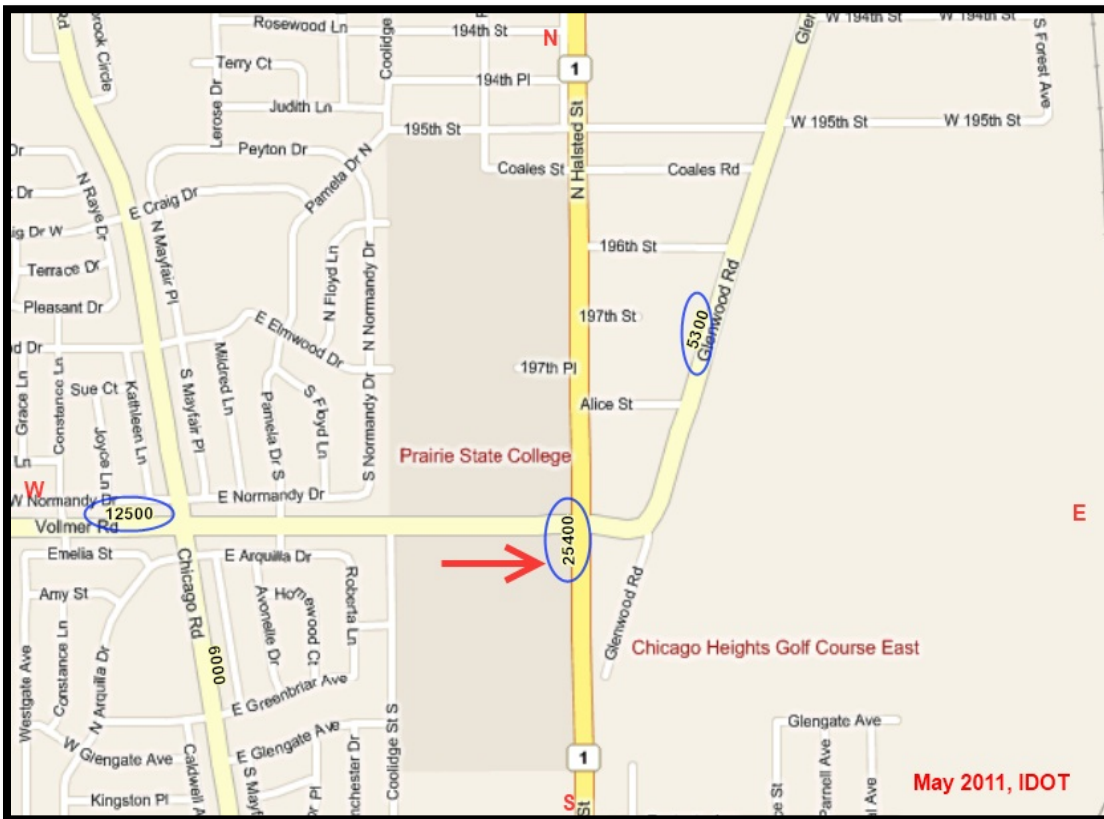

The traffic numbers below were obtained from the IDOT website per the RLR Guideline document published by IDOT. Only ADT values were available, peak numbers were not provided.

IL Route 1 (Halsted Street) ADT

- North: 25,400
- South: 25,400

Vollmer Road ADT

- East: 5,300
- West: 12,500

December 2013

The traffic numbers below were obtained from the IDOT website per the RLR Guideline document published by IDOT. Only ADT values were available, peak numbers were not provided.

Halsted St ADT

- North: 23,500
- South: 23,500

Vollmer Rd ADT

- East: 5,300
- West: 12,500

Summary

All processes are in compliance with the RLR regulations laid out by the Illinois Department of Transportation District 1 Bureau of Traffic Operations.

After analyzing all of the available data, we believe that the RLR cameras currently in operation at the intersection of Vollmer Rd and Halsted St in the **City of Chicago Heights** are making a contribution toward improved traffic safety at this location. Following the installation of RLR cameras, Turning style crashes have been reduced significantly and were completely absent in 2013, as were Angle crashes. This reduction has come in spite of an overall increase in traffic volume at this intersection.
